Languages: JavaScript, HTML, CSS, Sass, Python, Ruby, SQL, Java, C++, R

Tools: React, Bootstrap, jQuery, Git, Adobe Illustrator, Photoshop, Visual Studio, Eclipse, SolidWorks

EXPERIENCE

Front-End Developer,

Intrigue, Guelph, ON

2018

- Built a responsive React app that cleanly presents data to clients to improve transparency between clients and the business
- Created the front end for new features of a web app used company-wide for client work, using JavaScript
- Remodelled the front end of and added new features to a client-facing ticket management web app

Custom Output Developer / Data Science Intern,

Nulogy, Toronto, ON

2017

- Coded customer-facing labels and documents using HTML/CSS/ERB
- Retrieved data from a PostgreSQL database through SQL queries for metrics that predict customer success
- Automated data retrieval and compilation into Excel with an R script to evaluate customer success in a given period

Junior Technical Systems Analyst,

Royal Bank of Canada, Mississauga, ON 2017

- Designed and prototyped **UX/UI** for a mobile travel insurance application adopting Agile development
- Created easily recognizable user interface icons with Adobe Illustrator
- Maintained software changes and deployed code using Endevor, CA Harvest, Jenkins, and IBM

PROJECTS

Wanderloo, Front-End Developer 2017

 Designed and developed a web application that produces a customized running route based on user preference in the Waterloo region in HTML/CSS & JavaScript

Employee Database, Developer 2016

 Collaborated in a team of two to design and program a database in Java that has add, search, modify, and delete functionality
